

## **Grenoble-Tohoku Joint Lab for HTS**

On November 22, 2019, the Institute for Materials Research, Tohoku University (IMR) and Laboratoire National des Champs Magnétiques Intenses (LNCMI), France and Laboratoire de Génie Electrique de Grenoble(G2Elab), France and Institut NÉEL, France agreed on the establishment of a Joint Laboratory. These institutions promote cooperation and exchange within the field of development of a high field magnet with high temperature superconducting materials and high magnetic field research in order to foster academic research and nurture the creative talents of young researchers.

### **MOU Signing Ceremony**

The IMR, the LNCMI, the G2Elab and the Institut NÉEL have signed a Memorandum of Understanding (MoU) on November 22, 2019 in Grenoble. This ceremony was held during the “6th Japanese-French High Field & HTS Magnet Technology Research Collaboration Workshop 22nd – 24th November 2019 – France “.
